

# Technical Advisory Council (TAC) Meeting

*October 19, 2023*

This meeting is being recorded.

**CONFIDENTIAL COMPUTING  
CONSORTIUM**

# The Confidential Computing Consortium

A community focused on open source licensed projects securing DATA IN USE & accelerating the adoption of Confidential Computing through open collaboration

Every member is welcome; every project meeting our criteria is welcome.  
We are a transparent, collaborative community.

We as members, contributors, and leaders pledge to make participation in our community a harassment-free experience for everyone.

# Antitrust Policy Notice

- › Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.
- › Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at <http://www.linuxfoundation.org/antitrust-policy>. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrave of the firm of Gesmer Updegrave LLP, which provides legal counsel to the Linux Foundation.

# Agenda

1. Welcome, roll call, introduce any first-time attendees
2. Approval of minutes
3. Action Item Review
  - a. IAB Response via Attestation SIG
  - b. ONCD RFI vote
  - c. rust-spdm mentor
  - d. outreach / TAC sync
4. Project Proposal: Certifier Framework (VMWare)
5. 2024 TAC Planning: Goals & Budget
6. Any other business
  - a. Next meeting agenda
    - TBD
  - b. Issues/Pull requests
    - TBD

# Roll Call

# Action Item Review

1. [Dan/Kurt] 2/9: to look into a communication channel (mail list?) for discussing cross-project security concerns
  - a. 3/21: Mail list created, need mentors to contact their projects for the right person to monitor
  - b. 4/20: ~~[Thomas] Veraacruz~~ (contacted: Derek or Mathias); OE (Radhika)
  - c. 5/4: Remaining mentors/projects; Kurt will ping the TAC list again.
2. [Kurt] 3/23: revise the Project review timeline and Tech Talk slides to show current status (In progress)
3. [Kurt] ask Outreach committee if they needed a source .md file for the “Confidential Computing: Hardware-Based Trusted Execution for Applications and Data” white paper
4. [Kurt] get the latest recommendations on how the LF LFX license scans are started and what code-bases are supported (In progress, Kurt to get LFX Security to come to a future TAC)
5. [Pawan] find a TCG expert for review the GRC Customer Guide wording, maybe Henk Birkholz or Ned Smith
6. [Kurt] work with Tyler on the next steps to take the proposal to the Governing Board for approval (In progress)
7. [Dave] update the Project Progression PRs and create a new PR for the name changes
8. [Kurt] cleanup charters after DM merges #90 ("Projects" directory for the charters not the current "project-charters" directory in governance)
9. [Kurt] sync with Lily for kicking off a cross-project maintainer's meeting (discussed at CC Summit)
10. Dave volunteered to create an author listing for Google Scholar
11. Kurt to see if LF expense template can be shared and linked to this document

# Deferred topics / Backup

# Attestation Wikipedia Article

Where do we want to do this?

- TAC
- AAA SIG ←
  - Work offline, mail list, updates in the SIG, etc.
- ...

Are there other groups we should involve?

- TCG (Henk volunteered)
- ...

# Project Website Funding

Gramine and Veraison have both asked for website updates

- Rough estimate approximately \$5K each (\$16k for github page)
  - Existing budget allocated \$10K total for all projects for “Project IT Services and Collab Tools” which would cover website redesign
  - Gramine also needing VPS Cloud services from the same budget item
- 1) Gramine VPS could be funded out of “Test Infrastructure/Hardware” budget (\$10K) and that would allow all the 10K from Project IT Services to be used on websites
  - 2) The TAC could get Governing Board approval for additional funding for Project IT Services
  - 3) The TAC could also/instead get approval to allow funding to be shifted from Test to IT
  - 4) Seek competitive bid from outside LF?
  - 5) Associate this spend level with progression level

# Reference: CCC project benefits

CCC projects have access to a number of benefits:

- Up to \$10K in budget for hardware and software per year
- Funding for one Outreachy intern
- TAC mentor assigned to the project
- Collaboration tools (contact [operations@confidentialcomputing.io](mailto:operations@confidentialcomputing.io)):
  - Zoom
  - Domain registration and renewals
  - Mailing lists
  - YouTube playlists
  - Slack
- Optional security scanning
- LFX tools (<https://lfx.linuxfoundation.org>)

# Annual reports

[governance/project-progression-policy.md at main · confidential-computing/governance \(github.com\)](https://github.com/confidential-computing/governance/blob/main/governance/project-progression-policy.md)

“The review includes the following:

1. Review whether any answers to the project's submission template or Technical Charter have changed, and if so, review the new answers. A representative from the project is responsible for presenting any deltas to the template answers since the last review, if any. If there are no changes, there is nothing to review here.
2. Review the project's progression status to determine whether the project is in the stage that accurately reflects its needs and goals. For example, is it already ready to move to another progression level? Is it on track at the current level? Is any action needed from the TAC (e.g., change in or addition to any project mentor(s))? If nothing has changed significantly, there may be nothing to review here.
3. Review any budget allocations relevant to the project, and whether any adjustments are needed.
4. Review license scans provided by the Linux Foundation. Provide feedback on any outstanding issues and evaluate the scanning service from the project's perspective.

Projects are encouraged to proactively inform the TAC when something changes that affects their submission template or Technical Charter (changing a License, security reporting process, CoC, etc.), rather than waiting for the next annual review.”

# Reference: CCC project expectations

CCC projects are expected to:

- Participate actively in CCC activities (webinars, newsletters, events, etc.)
- Notify the TAC and Outreach committees of relevant news
- Participate in an [annual review with the TAC](#)
- Inform the TAC when [dependencies change so records can be updated](#)
- Maintainers should take the Linux Foundation's free [Inclusive Open Source Community Orientation](#) training course
- Transfer trademarks and domain registrations to the Linux Foundation
